Profile

Computer Science graduate with a strong foundation in Data Science, Data Analytics, Machine Learning, and Artificial Intelligence. Experienced in collecting, cleaning, analyzing, and visualizing data using Python, SQL, Power BI, and Excel to transform raw data into actionable insights. Hands-on experience with exploratory data analysis, statistical analysis, feature engineering, predictive modeling, and machine learning through academic and personal projects. Passionate about applying data-driven solutions to solve real-world business problems while continuously learning and expanding technical expertise.

Professional Experience

Data Analytics Trainee, DoLab Academy Completed hands-on training in end-to-end data analytics using Python, SQL, Excel, and Power BI. Performed data cleaning, transformation, exploratory data analysis (EDA), KPI development, dashboard creation, data modeling, and DAX to transform raw data into actionable business insights.	01/2026 – 04/2026
Software Engineering Internship, Fuzetek Focused on mastering core software engineering principles through real-world projects. Gained hands-on experience with SDLC, Agile methodologies, Jira, system design, design patterns, ISTQB fundamentals, OOP, algorithms, databases, and version control systems	07/2025 – 09/2025 Fifth Settlement, Cairo
Master AI and ML diploma, AMIT Comprehensive hands-on program covering Python, Data Science, Machine Learning, Deep Learning, Computer Vision, NLP, and MLOps. Gained practical expertise in building, training, and deploying AI models — from data preprocessing to real-world deployment using TensorFlow, PyTorch, and cloud platforms.	07/2023 – 03/2024 Nasr City, Cairo

Skills

Programming & Databases

Python, SQL, MySQL, Pandas, NumPy

Data Analysis & Visualization

- Data Analysis
- Data Cleaning & Preparation
- Exploratory Data Analysis (EDA)
- Statistical Analysis
- KPI Reporting

Business Intelligence

- Power BI
- Dashboard Development
- Data Visualization
- Business Reporting

Artificial Intelligence

- Machine Learning
- Deep Learning
- Computer Vision
- Natural Language Processing
- Predictive Analytics

Tools

- Excel
- Power BI
- Jupyter Notebook
- Git
- VS Code

Projects

AI Pharaoh

Developed an AI-powered cultural heritage interpretation system combining Computer Vision, NLP, and Machine Learning to automatically analyze Egyptian hieroglyphs and monuments through a multi-stage intelligent pipeline.

Data Analytics Projects

Conducted an end-to-end business analytics project using Python, SQL, Excel, and Power BI. Performed data cleaning, feature engineering, exploratory data analysis, KPI development, statistical analysis, and dashboard creation to generate actionable business insights from a multi-table e-commerce dataset.

Face Recognition System

Built an AI-based facial recognition system using FaceNet and MTCNN for real-time identity recognition and intelligent image analysis.

AI-Powered Interactive Systems

Designed AI-based tools that combine computer vision and algorithmic visualization:

- Emotion Detection System: Real-time facial emotion classification for mental health and user engagement scenarios.
- PathFinder Pro: Interactive visualization of search algorithms (A*, BFS, DFS, Greedy) in dynamic environments.

Certificates

Data Analytics Diploma

Dolab Academy

Machine Learning & Deep Learning

Zewail City of Science and Technology

Artificial Intelligence

Ambassadors Program

Engineers For Sustainable Egypt and NTI

Artificial Intelligence

The British University in Egypt

Deep Learning for computer vision

Udemy

Neural Networks and Deep Learning

Coursera

Education

Bachelor of Computer Science, *October University for Modern Sciences and Arts*

Bachelor of Computer Science, *University of Greenwich*
